Summary

Technical Lead with nearly 3 years of successful career by commendable performance in ASP.NET Core, SQL Server.

Solution- driven .Net Developer adept at contributing to highly collaborative work, finding solutions and determine customer satisfaction.

Web Development with rich experience in Asp Net Core, Mvc, Web Api, and SQL.

Fully Responsive and User Friendly. Designed and developed web applications across multiple multiple APIs, third-party integrations and databases.

ASP.Net Core / MVC

C#

Entity Framework Core

Restful API

Identity

Git/GitHub

Store Procedure/Function

Design Pattern

N-Tier Architecture

Dependency Injection

Experience

CF Dotnet Developer

Coder Foundry

Oct 2021 - Nov 2021 (2 months)

Build MoviePro Application using C#, Asp.net Core. MoviePro is online movies search application.

Adding different roles with Policy Based Authorization.

Everything built as a Service including Image Service, ConnectionService, API calling to third-party application, MappingService with their interfaces.

Storing Critical Information in JSON format creates classes and access them using Service.

Create classes for storing JSON information from API

Create multiple classes for storing appsettings information.

Calls API via IHttpClientFactory interface.

Deserialize the objects coming from API's and store the values in the database.

📊 Dotnet Developer

Coder Foundry

Aug 2021 - Present (4 months +)

Build Bug Tracking System using C# .Net. Bug tracking system is very crucial system in every software organizations so I am proud to built it using .Net Core. Adding roles of Admin, Project Managers, Developers and much more.

Build a C# application called Mortgage Loan Calculator using MVC pattern.

Building BS designs and layouts sizing the grids column, components, working with flex.
Deploying applications to different hosting, (Azure, heroku, bluehost, netlify).
Understanding the Git, Github how to publish code with branches. Implementing CD/CI.
Build different javascript projects which solves business problems deploying it to netlify with CD/CI technique.

Dotnet Developer
Eziline Software House Pvt Ltd
Jun 2021 - Aug 2021 (3 months)
Designed and developed N-tier web applications using ASP.NET Core and securing using JWT Token.
Hands on and implemented MVC Core concepts like Dependency Injection, Middle wares, Session management techniques.
Good knowledge on function apps, mini sites, logic apps, storing files and folders.
Good understanding of implemented design patterns like Iterator, Singleton, Factory, Repository and MVC(Model-View-Controller).
Testing API's using NUnit.
Developing systems built on SQL server using Tables, Views, Functions and Stored Procedures and maintaining the database, including requirement analysis, design, loading and implementation.
Created company's landing page using Bootstrap, HTML (with semantic block-element-modifier-syntax), CSS, Jquery.
Version Control Using Git with CD/CI.
Working on phases of System Development Life Cycle (SDLC) using Agile SCRUM based development methodologies.

Dotnet Developer
Eziline Software House Pvt Ltd
Apr 2021 - Jun 2021 (3 months)
Complete SRS design following agile methodology to complete projects. Student Portal System enables student to mark attendance.
Working with the project manager prepared and submitted reports and other documentation details.
Identify errors and providing the best solutions.
Design and develop UI, website layouts for user friendly environment.
Defining roles, claims for doing specific task.
Validating two ways data and adding configuration not possible with just Data Annotation
Working with Fluent API's to make a relation between tables.
Building API's, testing with the Postman and Swagger UI.
Good understanding of API workflow.
Creating custom middle wares and return types.
Good knowledge of how filtering and sorting data along with adding server-side paging.
Deep understanding of dependency Injection and its concepts on creating their objects.

Dotnet Developer
Web-Sol
Jun 2020 - Nov 2020 (6 months)
Done project in Asp.net Core
Build an online Food Ordering services web application.
Working with team to design best UI design for website that used Bootstrap theme for whole project.

Good understanding of eco system of C#.
Perform Basic CRUD functionality
Adding Relation for Category, Sub-Category with its Main Item.
Saving image on Server and Database also.
Adding Authorization and Authentication For Registering an order.
Showing A list of orders that customers done.
Use Sessions for Individual User and set a timeout for again login.
Use Facebook authentication.
Use Stripe for Online Payment.

Dotnet Developer
Web Sol
Mar 2020 - Jun 2020 (4 months)
Complete the project in Asp.net Core
Build an online home services web application.
Used Repository Pattern.
Used Bootstrap theme for my front page.
Perform Basic CRUD functionality on Services that website provides and
Adding Relation for Services with its frequency for a time of period.
Adding Authorization and Authentication For Registering a Service.
Showing a list of orders that customers done with nice Search bar with Username, Phone No, Order, Email Serach Criteria.
Use Sessions for Individual User and set a timeout for again login.

Intern
Web Sol
Jan 2020 - Feb 2020 (2 months)
Build A BookList Application in Asp.Net Core 3.0
Perform the CRUD Operations for Booklist.
Using third party library for fonts and icons.
Showing a nice message box for creating and delete a book record.
Show A warning Box when User try to delete a record.

Software Engineer
Oct 2019 - Dec 2019 (3 months)
Build A Bank Management System in C# console application.
Ask User for its choice whether creating an account or checking its balance.
Using Arrays and list to store customers details.
Creating Current or Saving Account with inheritance concept.
Separate the Program, Data Model and Business Logic.

Education

Bahria University
Bachelor's of Computer Science, Web Development
2016 - 2021

Punjab Group Of Colleges
ICS, Computer Science
2014 - 2016

Licenses & Certifications

Certified .Net Specialist - EVS Professional Training Institute

Introduction to Programming Using HTML and CSS - Udemy

Introduction to Asp.net Core 3.0 - Udemy

Skills

Asp.Net Core • ASP.NET Web API • jQuery • SQL • HTML5 • Cascading Style Sheets (CSS) •
JavaScript • Object-Oriented Programming (OOP) • C# • Bootstrap
